EDUCATION

Fairleigh Dickinson University

2025–2027

Master of Science in Computer Science

GPA: 3.34

- Relevant coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Web Technologies.
- Eligible for Software Engineering Intern roles with remaining terms after internship.

J.P. Dawer Department of ICT, VNSGU

2020–2024

Bachelor of Science in Information Technology

SKILLS

Languages: Java, JavaScript, TypeScript, HTML5, CSS, PHP, Node.js, AngularJS, jQuery, Swift, Objective-C, C, C++

Frameworks / Tools: React.js, Bootstrap, Git, Version Control, Xcode, DevOps (CI/CD concepts, learning), R (learning)

Databases: MySQL, SQL, Oracle, MongoDB, Relational Database & Normalization

Core: Data Structures & Algorithms, OOP, UI/UX Design, Software Documentation, Debugging, Problem Solving

EXPERIENCE

SAFEInvest LLP – IT Intern | 2023–2024

- Developed a dynamic, interactive CMS-based newsletter archive system with an optimized UI, improving user engagement by approximately 30%.
- Built and deployed an admin dashboard to manage content and users, reducing manual content update workload by roughly 50% and improving operational efficiency.
- Collaborated with stakeholders to refine requirements and iteratively refine information architecture, usability, and performance using software engineering principles.

Junior Computer Lab Technician | September 2025–Present

- Maintain and support 90+ workstations across multiple labs, contributing to high system availability and minimal downtime for students and faculty.
- Perform routine maintenance on lab systems, including software updates, hardware checks, and troubleshooting OS/application issues, and escalate user incidents within defined SLAs through the SAMI ticketing system.
- Log, track, and escalate tickets as needed while communicating status clearly to users, demonstrating time management and collaboration in a production environment.

PROJECTS

Docnatic (2023)

- Built a full-stack to generate reusable report, letter, and cover-page templates, cutting manual template search time for users by an estimated 40%.
- Designed and implemented a responsive, accessible UI using modern HTML/CSS and JavaScript to support community sharing, versioning, and reuse of templates.

Comubridge (IIT Bombay Semi-Finalist, 2022–2023)

- Developed a communication app tailored for intellectual, hearing, visual, and speech-impaired users, applying UX and accessibility best practices to improve communication effectiveness.
- Implemented accessible UI elements and interaction flows, collaborating in a team environment to refine requirements and iterate on user feedback.

Track-O-Bar (IIT Bombay Quarterfinalist, 2021–2022)

- Engineered a barcode-based inventory and crop lifecycle tracking solution for agriculture use cases, demonstrating end-to-end system thinking from data capture to reporting.
- Delivered technical and product presentations to academic and industry reviewers, articulating system architecture, constraints, and real-world impact.

GPS Safety Device (2021)

- Designed a wearable real-time GPS-based tracker focused on reliable real-time location updates for personal safety scenarios.
- Documented system requirements, hardware-software integration assumptions, and potential extensions for alerting and geofencing.
